Here are some of the companies we've partnered with along with Hands On Bay Area! They include Apple, Intel, Hitachi, HIS, Google, Netflix, and Iron Construction.

Be a part of our cleanups; talk to your company about joining in our efforts by sponsoring an event or adopting a portion of our waterways.

TAKING BACK OUR CREEKS AND RIVERS

Since 2013, South Bay Clean Creeks Coalition has worked to Reclaim, Restore and Revitalize the creeks and rivers of our Santa Clara Valley.

We've cleaned out over 150 tons of trash from the Los Gatos Creek and the Guadalupe River.

Our commitment to healthy creeks and rivers goes beyond cleanups and now includes Water Testing, Youth Stewardship, Invasive Plant Removal and Corporate engagements.

Come help us do more!

RECLAIM

RESTORE

REVITALIZE

In 2013, South Bay Clean Creeks Coalition, originally known as Friends of Los Gatos Creek, launched an effort to reclaim 12 miles of Los Gatos Creek. To date, we have conducted 115 cleanups removing 152 tons of trash. We have worked diligently to Reclaim, Restore and Revitalize these creeks through:

TEAM 222 Cleanups

Corporate Cleanups

Citizen Monitoring of Reclaimed Areas

Youth Stewardship Program with Local Elementary and Middle Schools

Water Testing Partnership with De Anza College

College Internship with San Jose State University

Invasive Plant Removal

Recycled Artwork

Our work focus is on the removal of trash in former encampments, which generally requires a series of cleanups. Citizen monitors then follow up by alerting policing agencies of any re-encampment activity to help retain a trash-free environment.

During our 222 Cleanups or one of our Corporate/Church sponsored events, our volunteers remove an average of two tons of trash from a quarter mile stretch of our creeks and rivers.

We were so impressed and appreciative of your group's work. The homeless camps are gone and trash is minimal. There are not enough words to thank you for caring!"

— Sue Robertson
Willow Glen Homeowner

Join us for our next cleanup and you'll see what an impact just two hours of work will make on our lovely creeks and rivers.

Partially Funded by Generous contributions from:

Once a creek or river has been restored, there's more work to be done to ensure the health of our returning wildlife.

Our programs include:

A team of citizen monitors to alert policing agencies of any re-encampments activity.

Water testing to identify the health of our streams.

The testing program identifies pollutants, water clarity, PH levels, dissolved oxygen, bacteria, nutrients and temperature.

Fish Management to ensure sustainable populations of fish, shellfish, amphibians, and marine mammals
